

Electric Hydraulic Scissor Lift

The scissor mechanical structure of the Electric Hydraulic Scissor Lift enables the lifting platform to have a higher stability, a large working platform and a higher load-bearing capacity. The Electric Hydraulic Scissor Lift makes the working range at high altitude wider and is suitable for multiple people to work at the same time. The structure of the Electric Hydraulic Scissor Lift makes high-altitude operations more efficient and safer.

1. Electric Hydraulic Scissor Lift

The main feature of the Electric Hydraulic Scissor Lift is that it does not require manual operation, it is convenient and flexible, and the lifting speed can be controlled. The Electric Hydraulic Scissor Lift does not need a power source and has a certain automatic walking ability; this kind of Electric Hydraulic Scissor Lift is often used in large stadiums and railway stations, Airports and other important places appear, which can help people to work effectively. The overall structure of the Electric Hydraulic Scissor Lift is relatively stable and will not be easily affected by the outside world. It can ensure the work demand and at the same time achieve the purpose of saving labor and effort.

2. Specification

	DP300	DP500	DP800	DP1000
Load Capacity (kg)	300	500	800	1000
Min.Height (mm)	280	280	410	410
Max.Height (mm)	900	900	1000	1000
Table Demension (mm)	950*500*50	950*500*50	1200*610*50	1200*610*50
Dia.of the wheel (mm)	125	125	150	150
Voltage (V)	12	12	12	12
Power (Kw)	0.8	0.8	0.8	0.8
Storage Battery (Ah)	60	60	60	120
Charger input Voltage (V)	220/110	220/110	220/110	220/110

Net Weight (kg)	110	110	150	150
-----------------	-----	-----	-----	-----

3. Feature And Application

The Electric Hydraulic Scissor Lift is firm, safe and reliable. At the same time, its design is matched with a unique ergonomic design, which can ensure safety while also enabling users to have a more comfortable experience. The Electric Hydraulic Scissor Lift is Suitable for lifting and handling heavy objects in factories, food factories, warehouses, workshops, factories, etc. The Electric Hydraulic Scissor Lift makes high-altitude operations more efficient and safer. Not limited by running distance, stable performance and long service life.

4. Details

The Electric Hydraulic Scissor Lift uses a sealed oil cylinder with a firm structure to avoid oil leakage, uniform lifting speed, enhanced safety and service life, and high cost performance.

The scissor fork of the Electric Hydraulic Scissor Lift adopts reinforced thickened steel plate to enhance the lifting capacity and safe lifting.

HUGO[®]

www.hugoforklift.com

The Electric Hydraulic Scissor Lift has stable support, adopts dual-brake industrial pu wheels, strong bearing capacity, stable and safe body, sensitive locking, safe and worry-free.

The Electric Hydraulic Scissor Lift adopts thickened paint surface, thickened steel plate, and paint process, which is anti-corrosion and anti-rust, firm and beautiful

5. Product Qualification

Shanghai Yiyong Crane Machinery Company is the hoist manufacturer Institute certified. This means we are one of the industry's leading suppliers of hoist equipment. We are reliable and deliver exceptional value. Our Electric Hydraulic Scissor Lift have professional quality inspectors to conduct quality inspections to ensure that all aspects of the products meet the buyer's requirements. If our

Electric Hydraulic Scissor Lift have quality problems during the warranty period, we are willing to take the corresponding responsibility.

6. Deliver, Shipping And Serving

Our Electric Hydraulic Scissor Lift are packed in pallets to ensure the safety of products during transportation. We provide a one-year quality guarantee and long-term supply of spare parts. During the quality guarantee period, if there is any damage other than man-made and natural wear and tear, we will provide free parts and maintenance guidance.

7. FAQ

Can I use it in the factory?

Yes. Our Electric Hydraulic Scissor Lift are suitable for factories, construction sites, food factories and other places that require heavy lifting and handling to meet your needs

What are the specifications of your products?

Our platform trucks are 150/200/350/500kg, you can choose according to your handling needs.

Is the quality of your products guaranteed?

Yes. Our Electric Hydraulic Scissor Lift use thickened and reinforced materials and structures to ensure that they meet the standard load-bearing requirements during use. We provide a one-year quality guarantee. In the process of quality assurance, there are non-man-made problems, we will provide free parts and video installation instructions.
