

**Hydraulic Table Lifter**

Hydraulic Table Lifter is often referred to as the lifting platform car. Hydraulic Table Lifter is used for the lifting mechanical equipment of aerial operation and maintenance. Hydraulic Table Lifter has the characteristics of stable structure, flexible movement, smooth lifting, convenient operation and large load. It is convenient for the working units at high altitude device.

**1. Hydraulic Table Lifter**

Hydraulic Table Lifter is made of high strength steel, reasonable design structure, safe, stable and reliable, built-in safety valve, fully sealed cylinder, manual control hydraulic system lifting, easy to operate. Equipped with nylon guide wheel to save the operator's physical strength, and can protect the load wheel and tray load wheel. Hydraulic Table Lifter unique hydraulic pump design, simple pump for assembly line loading and unloading operation to maintain an ideal height design; With unique ergonomic design, the operator is comfortable to operate.

**2. Hydraulic Table Lifter Specification**

specificationmodel	Fab150	Fac200	Fab350	Fab500	Fac350	Fac500
Load bearing(kg)	150	200	350	500	350	500
Maximum height(mm)	720	2000	900	900	1300/1500	1300/1500
Minimum height (mm)	210	410	280	280	350	350/400
Worktable size	700*450*40	925*665*55	820*500*50	820*500*50	920*500*50	920*500*50
Wheel diameter(mm)	100	125	125	125	125	125
Handle height(mm)	730	960	960	960	960	960
Body length(mm)	780	980	880	880	980	980
Operating weight(kg)	42	137	74	80	103/107	107/113
Outer packing dimensions(cm)	78*53*31	100.5*68.5*31	90*51*31	90*51*31	100*50*31	100*51*31

### 3. Hydraulic Table Lifter

Hydraulic Table Lifter is novel in design, reasonable in structure and convenient in use. Hydraulic Table Lifter is suitable for loading, unloading, handling and stacking of garden barrels in factories, workshops, warehouses and oil depots. Especially suitable for chemical, food workshop materials or ingredients, and can be will weight loading and unloading, stacking car, cooperate with hydraulic cylinders in carrier operations, can greatly improve the work efficiency, reduce the labor intensity of workers, and also hydraulic Table Lifter can be adapted to loading and unloading, lifting heavy objects, is a new kind of ideal multipurpose landing handling machinery.

### 4. Hydraulic Table Lifter

#### ① Oil Cylinder

Leak-proof oil-sealed oil cylinder, with stronger load-bearing capacity and stable performance. Fully enclosed oil cylinder, equipped with overload protection device, can effectively prevent overloading, good sealing performance and easy maintenance.

### ②Thickened Scissor Fork

The scissor fork is made of high-quality steel. It refuses to cut corners and cut materials to ensure the firmness of the product. Thickened shear forks increase the carrying capacity, ensure the safe and stable lifting of the cargo, and improve the safety of the vehicle.

### ③Upgrading And Thickening Paint Countertops

Durable and corrosion-resistant.

#### ④ Brake Casters

Wear-resistant polyurethane wheel casters with brake function, safe and convenient for daily use, suitable for a variety of floors such as epoxy paint, durable and wear-resistant, strong load bearing capacity, long service life, and reduce floor wear.

#### ⑤ Elevator Controller

Pedal lit, there are pull-type handles and rotary stepless adjustment handles to lower, control ascending and descending, simple and convenient operation.

### ⑥ Ergonomic Handle

Folding handle, chrome-plated handle, with rust and corrosion resistance, beautiful appearance, comfortable grip, hand-held lowering handle, can control the lowering position.

## 5. Product Qualification

- (1) always treat after-sale service important as the product quality.
- (2) grants our clients a twelve-month-period or 2000-hours warranty for any machine purchased from us.
- (3) can also help clients coordinate with trained service personnel to provide you detailed and extensive knowledge about your specific machine. With our technical advises, your machine service life can be significantly prolonged and sustained with high capacity.

## 6. Deliver, Shipping And Serving

Packaging Details: Carton

Port:Tianjin Shanghai

Picture Example:

Lead Time:

Quantity(Pieces) 1 - 300 >300

Est. Time(days) 5 To be negotiated

## 7. FAQ

1. How about the sample policy?

We can accept sample order for testing quality. But sample and express charge should be on customer's account.

2. How long does it take to execute my order?

Please tell us the quantity and model number of the products of the order, so that we will give you a detailed schedule.

3. How can I know the completion of my order?

Upon receipt of the deposit, we will immediately arrange for the shipment, after the order is completed, we will also send you the detection images of your order before delivery for you to confirm.

4. Can you arrange to deliver the goods for us?

Yes. When finish the orders, we will inform you and also we can arrange the shipping in the same time. There is LCL shipping and FCL shipping for different order term, the buyer also can choose Air-transport or Ocean shipping for your requirement. When your orders reach your local nearest Sea port or River Port, the logistics company will inform you.

5. Can you guarantee your products?

Yes, we guarantee your 100% satisfaction on all our products.

Please feel free to back to us immediately if you are not satisfied with our quality or service. If the product does not meet the contract requirements, we will send you a free replacement or give you compensation in the next order.

6. Can I visit your company?

Of course. We always with great pleasure at your service. We have a factory in Jiangsu, China. If you want to order our products and visit our company, please contact us to make an appointment.

7. Do you offer customized design?

Customized design is surely available. We have very rich experience in customizing shelves.
